

Chemical Formulation Report

Product Information

Product Name: glass cleaner

Description: Professional liquid formulation for Cleaning Products - liquid

Technical Specifications

pH Level:	7
Viscosity:	low
Shelf Life:	24 months when stored properly
Batch Size:	1000ml
Processing Time:	2-3 hours
Temperature:	Room temperature (20-25°C)
Storage Conditions:	Store in cool, dry place away from direct sunlight
Equipment:	Standard mixing equipment, pH meter, thermometer
Certification:	Meets industry standards

Ingredients

Ingredient	INCI Name	%	Function
------------	-----------	---	----------

Deionized Water	Aqua	60.0%	Solvent
Glycerin	Glycerin	15.0%	Humectant and viscosity modifier
Carbomer	Carbomer	2.0%	Thickening agent
Sodium Hydroxide	Sodium Hydroxide	0.5%	pH adjuster
Preservative System	Phenoxyethanol, Ethylhexylglycerin	1.0%	Preservative
Active Ingredients	Various	20.0%	Primary active components
Fragrance	Parfum	1.0%	Scenting agent
Colorant	CI 19140	0.5%	Coloring agent

Manufacturing Instructions

Phase 1: Phase A

1. Combine Deionized Water and Glycerin in main vessel
2. Heat mixture to 70°C while stirring
3. Maintain temperature until uniform

Phase 2: Phase B

1. Slowly add Carbomer to Phase A under continuous mixing
2. Mix until fully dispersed and hydrated
3. Avoid creating excessive foam

Phase 3: Phase C

1. Adjust pH to 7 using diluted Sodium Hydroxide solution
2. Add dropwise while monitoring pH continuously
3. Mix thoroughly after each addition

Phase 4: Phase D

1. Cool mixture to below 40°C
2. Add preservative system and mix well
3. Add active ingredients gradually while mixing

Phase 5: Phase E

1. Add fragrance and colorant if specified
2. Mix until evenly distributed
3. Perform final quality checks and package

Usage Instructions

Apply as needed according to product instructions
