

PRODUCT NAME

Advanced Victory Test Formula

Description

A cost-effective cream designed for ultimate performance with a balanced pH level, ensuring gentle yet effective application.

Technical Specifications

pH Level:	7
Viscosity:	Medium
Shelf Life:	24 months
Batch Size:	100 - 500 kg
Processing Time:	3 hours
Temperature:	75°C for emulsification, cool to 40°C for final additions
Storage Conditions:	Store in a cool, dry place away from direct sunlight.
Equipment:	High shear mixer, heating vessel, pH meter
Certification:	ISO 22716 (Good Manufacturing Practices)

Formulation Table

Sr.No	Ingredient	INCI Name	%	Function
1	Water	Aqua	65.0%	Solvent and base for the cream
2	Cetearyl Alcohol	Cetearyl Alcohol	5.0%	Thickening agent and emulsifier
3	Glycerin	Glycerin	8.0%	Humectant and moisturizer
4	Caprylic/Capric Triglyceride	Caprylic/Capric Triglyceride	6.0%	Emollient for skin conditioning
5	Stearic Acid	Stearic Acid	3.0%	Thickening and stabilizing agent
6	Glyceryl Stearate	Glyceryl Stearate	4.0%	Emulsifier
7	Phenoxyethanol	Phenoxyethanol	1.0%	Preservative
8	Xanthan Gum	Xanthan Gum	0.5%	Stabilizer and thickener
9	Sodium Hydroxide	Sodium Hydroxide	0.1%	pH adjuster
10	Fragrance	Parfum	0.4%	Fragrance component
11	Tocopheryl Acetate	Tocopheryl Acetate	1.0%	Antioxidant and skin conditioning
12	Citric Acid	Citric Acid	1.0%	pH adjuster
Total			100%	

Manufacturing Process

Phase 1: Aqueous Phase

- Heat Water to 75°C.
- Disperse Xanthan Gum in heated Water and mix until fully hydrated.

Phase 2: Oil Phase

1. Combine Cetearyl Alcohol, Caprylic/Capric Triglyceride, Stearic Acid, and Glyceryl Stearate.
2. Heat to 75°C until melted and uniform.

Phase 3: Emulsification

1. Add Oil Phase to Aqueous Phase slowly while maintaining temperature at 75°C.
2. Mix using high shear until the emulsion is formed.

Phase 4: Cooling and Addition

1. Cool the emulsion to 40°C.
2. Add Glycerin, Phenoxyethanol, Fragrance, and Tocopheryl Acetate.
3. Adjust pH to 7 using Sodium Hydroxide and Citric Acid.
4. Continue mixing until evenly incorporated.

Required Equipment

High shear mixer, heating vessel, pH meter

Safety Precautions

Handling: Wear appropriate PPE including gloves, safety glasses, lab coat.

PPE Requirements: Chemical-resistant gloves, safety goggles, protective clothing.

Storage: Store in cool, dry place away from direct sunlight. Keep containers tightly closed.

Storage Conditions: Store in a cool, dry place away from direct sunlight.

Packaging Notes

Packaging: Use chemically compatible containers (HDPE, glass, or PET).

Labeling: Include product name, ingredients, usage instructions, and safety warnings.

Certification: ISO 22716 (Good Manufacturing Practices)

Scaling Note

Lab Scale: This formulation is designed for laboratory testing and development.

Pilot Scale: For pilot production, scale proportionally and verify all parameters.

Production Scale: Consider equipment limitations, mixing efficiency, and process validation.

Batch Size: Current formulation is optimized for 100 - 500 kg.

Scaling Factor: Maintain ingredient ratios while adjusting processing parameters as needed.

Product Usage Instructions & Application Guidelines

Apply a small amount to the skin and gently massage until absorbed. Use twice daily for best results.
