

PRODUCT NAME

Premium Final Debug Test Formula

Description

A professionally formulated, cost-effective cream designed for optimal performance with a pH level of 7. Its medium viscosity provides a smooth application, while the absence of colorants and fragrances ensures suitability for a wide range of skin types.

Technical Specifications

pH Level:	7.0
Viscosity:	Medium
Shelf Life:	24 months
Batch Size:	10-100 kg
Processing Time:	2 hours
Temperature:	70°C for mixing; cool to 40°C for final steps
Storage Conditions:	Store in a cool, dry place away from direct sunlight.
Equipment:	Jacketed mixing vessel, high-shear mixer, pH meter
Certification:	Complies with European Cosmetics Regulation (EC) No 1223/2009

Formulation Table

Sr.No	Ingredient	INCI Name	%	Function
1	Water	Aqua	60.0%	Solvent
2	Glycerin	Glycerin	15.0%	Humectant
3	Cetearyl Alcohol	Cetearyl Alcohol	8.0%	Emulsifier, Thickener
4	Ceteareth-20	Ceteareth-20	5.0%	Emulsifier
5	Caprylic/Capric Triglyceride	Caprylic/Capric Triglyceride	5.0%	Emollient
6	Butyrospermum Parkii Butter	Shea Butter	3.0%	Emollient
7	Phenoxyethanol	Phenoxyethanol	1.0%	Preservative
8	Carbomer	Carbomer	1.0%	Thickener
9	Sodium Hydroxide	Sodium Hydroxide	1.0%	pH Adjuster
10	Disodium EDTA	Disodium EDTA	1.0%	Chelating Agent
Total			100%	

Manufacturing Process

Phase 1: Aqueous Phase

1. Combine Water and Glycerin in a jacketed mixing vessel.
2. Heat to 70°C while stirring until homogeneous.

Phase 2: Oil Phase

1. In a separate container, mix Cetearyl Alcohol, Ceteareth-20, Shea Butter, and Caprylic/Capric Triglyceride.

2. Heat to 70°C and mix until all solids are melted and the blend is uniform.

Phase 3: Emulsification

1. Slowly add the oil phase to the aqueous phase while maintaining 70°C, using a high-shear mixer to form an emulsion.
2. Continue mixing for 15 minutes to ensure stability.

Phase 4: Cool Down

1. Allow the emulsion to cool to 40°C while stirring continuously.
2. Add Carbomer and mix until fully dispersed.
3. Adjust pH to 7 with Sodium Hydroxide solution.
4. Add Phenoxyethanol and Disodium EDTA, mixing thoroughly.

Required Equipment

Jacketed mixing vessel, high-shear mixer, pH meter

Safety Precautions

Handling: Wear appropriate PPE including gloves, safety glasses, lab coat.

PPE Requirements: Chemical-resistant gloves, safety goggles, protective clothing.

Storage: Store in cool, dry place away from direct sunlight. Keep containers tightly closed.

Storage Conditions: Store in a cool, dry place away from direct sunlight.

Packaging Notes

Packaging: Use chemically compatible containers (HDPE, glass, or PET).

Labeling: Include product name, ingredients, usage instructions, and safety warnings.

Certification: Complies with European Cosmetics Regulation (EC) No 1223/2009

Scaling Note

Lab Scale: This formulation is designed for laboratory testing and development.

Pilot Scale: For pilot production, scale proportionally and verify all parameters.

Production Scale: Consider equipment limitations, mixing efficiency, and process validation.

Batch Size: Current formulation is optimized for 10-100 kg.

Scaling Factor: Maintain ingredient ratios while adjusting processing parameters as needed.

Product Usage Instructions & Application Guidelines

Apply a small amount to cleansed skin, massaging gently until absorbed. Use daily for best results.
