

# PRODUCT NAME

---

## Professional Logo Test Formula

### Description

---

This is a cost-effective medium viscosity lotion designed for testing new logo and domain, optimized to maintain a stable pH level of 7. It is suitable for daily use on all skin types, providing hydration and nourishment without leaving a greasy residue.

### Technical Specifications

---

|                     |                                                       |
|---------------------|-------------------------------------------------------|
| pH Level:           | 7                                                     |
| Viscosity:          | Medium                                                |
| Shelf Life:         | 24 months                                             |
| Batch Size:         | 100-500 kg                                            |
| Processing Time:    | 3 hours                                               |
| Temperature:        | 20-25°C during storage                                |
| Storage Conditions: | Store in a cool, dry place away from direct sunlight. |
| Equipment:          | High-shear mixer, heating vessel, pH meter            |
| Certification:      | Not applicable                                        |

# Formulation Table

| Sr.No | Ingredient                   | INCI Name                    | %     | Function                    |
|-------|------------------------------|------------------------------|-------|-----------------------------|
| 1     | Water                        | Aqua                         | 60.0% | Solvent                     |
| 2     | Glycerin                     | Glycerin                     | 10.0% | Humectant                   |
| 3     | Caprylic/Capric Triglyceride | Caprylic/Capric Triglyceride | 10.0% | Emollient                   |
| 4     | Cetearyl Alcohol             | Cetearyl Alcohol             | 5.0%  | Emulsifying Agent           |
| 5     | Ceteareth-20                 | Ceteareth-20                 | 4.0%  | Emulsifier                  |
| 6     | Sodium Hydroxide             | Sodium Hydroxide             | 0.5%  | pH Adjuster                 |
| 7     | Phenoxyethanol               | Phenoxyethanol               | 1.0%  | Preservative                |
| 8     | Carbomer                     | Carbomer                     | 0.5%  | Viscosity Controlling Agent |
| 9     | Tocopherol                   | Tocopherol                   | 0.5%  | Antioxidant                 |
| 10    | Fragrance                    | Parfum                       | 0.5%  | Fragrance                   |
| Total |                              |                              | 100%  |                             |

# Manufacturing Process

## Phase 1: Phase A

1. Add water to the main vessel.
2. Sprinkle Carbomer over the water and let it hydrate for 15-20 minutes.
3. Add Glycerin and mix until homogeneous.

## **Phase 2: Phase B**

1. Combine Caprylic/Capric Triglyceride, Cetearyl Alcohol, and Ceteareth-20 in a separate container and heat to 70°C.
2. Stir until fully melted and mixed.

## **Phase 3: Phase C**

1. Once Phase B is uniform, slowly add it to Phase A while maintaining a temperature of 70°C. Mix thoroughly to create an emulsion.
2. Cool down the mixture to 40°C with gentle stirring.

## **Phase 4: Phase D**

1. Add Sodium Hydroxide solution to adjust pH to exactly 7.
2. Incorporate Phenoxyethanol and Tocopherol, and mix until evenly distributed.
3. Add Fragrance last, mix until homogeneous.
4. Adjust viscosity with additional Carbomer if necessary to achieve medium viscosity.

## **Required Equipment**

---

High-shear mixer, heating vessel, pH meter

## Safety Precautions

---

**Handling:** Wear appropriate PPE including gloves, safety glasses, lab coat.

**PPE Requirements:** Chemical-resistant gloves, safety goggles, protective clothing.

**Storage:** Store in cool, dry place away from direct sunlight. Keep containers tightly closed.

**Storage Conditions:** Store in a cool, dry place away from direct sunlight.

## Packaging Notes

---

**Packaging:** Use chemically compatible containers (HDPE, glass, or PET).

**Labeling:** Include product name, ingredients, usage instructions, and safety warnings.

**Certification:** Not applicable

## Scaling Note

---

**Lab Scale:** This formulation is designed for laboratory testing and development.

**Pilot Scale:** For pilot production, scale proportionally and verify all parameters.

**Production Scale:** Consider equipment limitations, mixing efficiency, and process validation.

**Batch Size:** Current formulation is optimized for 100-500 kg.

**Scaling Factor:** Maintain ingredient ratios while adjusting processing parameters as needed.

## Product Usage Instructions & Application Guidelines

---

Apply a suitable amount of lotion evenly on clean skin and massage gently until absorbed. Suitable for use on body and face.
